Definition

Then there's the definition environment which produces a standard ColorA color block but with the title already specified as 'definition'.

```
\begin{definition}  
A prime number is a number that...  
\end{definition}
```

定义

A prime number is a number that...

- 9 Theorem
- 10 Hyperlinks
- 11 Algorithm

Example

Next there's the example environment which produces a green block with the title 'Example'.

```
\begin{example}  
Lorem ipsum dolor sit amet...  
\end{example}
```

例

Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

- 8 Example
- 9 Theorem
- 10 Hyperlinks
- 11 Algorithm

Theorem

There is also a group of blocks that are especially useful for presenting mathematics. For example the ‘theorem’ environment, the ‘corollary’ environment and the ‘proof’ environment.

```
\begin{theorem}[Pythagoras]
```

$$a^2 + b^2 = c^2$$

```
\end{theorem}
```

```
\begin{corollary}
```

$$x + y = y + x$$

```
\end{corollary}
```

```
\begin{proof}
```

$$\omega + \phi = \epsilon$$

```
\end{proof}
```

Theorem Blocks

定理 (Pythagoras)

$$a^2 + b^2 = c^2$$

推论

$$x + y = y + x$$

证明.

$$\omega + \phi = \epsilon$$

Hyperlink

Before we can create any hyperlinks we need to tag the frames we want to link to using the ommand.

A trivial Set Cover algorithm

Algorithm 1: $\text{MSC}(\mathcal{S}, \mathcal{U})$

Input : A set cover instance $(\mathcal{S}, \mathcal{U})$ and a variable \mathcal{S}_{dom} .

Output : A minimum set cover of $(\mathcal{S}, \mathcal{U})$.

```

1 if  $\mathcal{S} = \emptyset$  then
2   return  $\emptyset$ ;
3 Let  $S \in \mathcal{S}$  be a set of maximum cardinality;
4  $\mathcal{C}_1 = \{S\} \cup \text{MSC}(\{S' \setminus S \mid S' \in \mathcal{S} \setminus \{S\}\}, \mathcal{U} \setminus S)$ ;
5  $\mathcal{C}_2 = \text{MSC}(\mathcal{S} \setminus \{S\}, \mathcal{U})$ ;
6  $\mathcal{S}_{\text{dom}} \leftarrow \emptyset$ ;
7 if  $\mathcal{U} \subseteq \mathcal{C}_1$  then
8    $\mathcal{S}_{\text{dom}} \leftarrow \mathcal{C}_1$ ;
9   if  $\mathcal{U} \subseteq \mathcal{C}_2$  then
10     if  $|\mathcal{C}_2| < |\mathcal{C}_1|$  then
11        $\mathcal{S}_{\text{dom}} \leftarrow \mathcal{C}_2$ ;
12 return  $\mathcal{S}_{\text{dom}}$ ;

```
